

SELECTMOBILE

Mobile Remote Deposit Capture for Consumers

RDC is not just for PCs™
The industry's premier
Mac platform for RDC

Bottom-line Results

Save Time and Money

Simple. Safe. Secure.

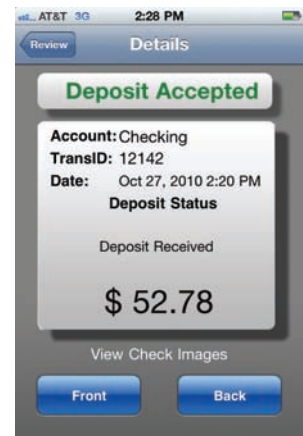

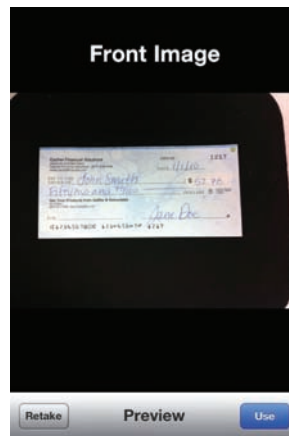

World-class Service

Select Mobile is Cachet's consumer-based remote deposit capture solution. With Select Mobile, financial institutions are able to offer all the advantages of RDC to their valued retail customers. Consumers using iPhones, Blackberrys and Android-based smart phones are now able to do their banking remotely by simply taking a picture of their check sending the information to their financial institution.

Select Mobile allows account holders to initiate mobile-banking sessions, key in their deposit amounts and snap photos of both the front and back of checks with their smart phone cameras. Select Mobile captures the check and converts it to an industry standard Check 21 image for transmission to the financial institution's remote deposit capture (RDC) platform. Before transmitting the check images, Select Mobile formats the images, automatically corrects any image distortions or skewing and confirms that the images meet Check 21 and mobile image-quality standards. After the checks are submitted successfully, account holders receive notification back from their financial institution alerting them that the transaction was successfully completed. All transactions are transmitted with multiple layers of security and, if necessary, can be traced back to registered smart phones, marked with time and location, in order to combat fraud.

- ◆ **Convenient:** Customers can deposit checks from anywhere, at any time.
- ◆ **Secure:** Two-factor login authentication, data encryption on phone and en route to safe server.
- ◆ **Accurate:** Captures and optimizes images and automatically extracts payment data.
- ◆ **Check 21 compliant:** Ensures only images satisfying FSTC image quality standards pass.
- ◆ **Easy to download and use:** Integrates into existing mobile wallets or stand-alone.
- ◆ **Fast:** Deposit in just three steps: enter amount, image front, image rear.
- ◆ **State-of-the-art encryption:** Strong protection to keep your data secure.
- ◆ **Financial Institution-approved image standards:** Front and rear check photographs automatically verified and converted.
- ◆ **Multi-account capable:** User can deposit into one of several accounts.
- ◆ **Review history:** Recent deposits viewable on phone (if financial institution policy permits).
