

# select BUSINESS™

## *Do you want to offer your business customers Remote Deposit Capture, but are afraid of the security and investments required?*

With Cachet's *Select Business*™ software, you are able to offer your business clients of all sizes the ability to scan and deposit checks from their PC or Mac computers. *Select Business*™ allows customers to utilize a desktop check scanner to create digital images and submit them electronically for deposit, avoiding the deposit slips, driving, and waiting that used to accompany trips to the branch. *Select Business*™ gives your customers faster access to funds, all while reducing your operational costs and increasing profitability.

## *We Believe RDC Should Be Available to All*

That's why we created *Select Business*™ Mac. Our industry-leading, patent-pending solution allows you to offer your valuable Mac customers the advantages of RDC without technology restrictions.

Cachet is also proud to offer a TWAIN-based scanner solution for small and home offices. Let your customers with fewer checks benefit from the convenience and security of RDC with a flatbed scanner.

## *Cachet's Features will Ensure You and Your Clients Get the Most out of your RDC Initiative:*

**Duplicate Item Detection:** detects if a single item has been deposited multiple times.

**Image Quality Analysis and Usability Tests:** helps identify if an image meets certain requirements for clearing.

**Field Permission Capabilities:** prevents the end user from editing or entering information contained on a check's MICR line.

**Multi-Level and Multi-User Security Levels:** assign roles and access rights to scan, review and transmit deposits.

**Audit Trail Logging:** tracks all action on the system with reporting capabilities to view and monitor activities.

**Help Desk Support:** 24 hours a day, seven days a week.

**Virtual Endorsement:** electronically imprints an endorsement on the submitted check image.

**Integration and Compatibility:** integrates with existing core processors using a standard file format.

**Marketing & Sales Support:** To ensure success, we will work with you to develop marketing and selling strategies to most effectively target your customers.

## *Get Started Today!*

At Cachet, we strive to meet the widest possible variety of client needs. Through our unique *Select Business*™ applications, we offer you the chance to do the same. **Contact Cachet today to find out more!**

*“Columbus Community Bank chose Cachet Financial Solutions to be our remote deposit capture (RDC) provider because of the marketing and customer support provided with their proven solutions.*

*“We are delighted with the implementation and performance of the software. The services and support offered by Cachet have been exceptional, and we expect to continue to grow our business utilizing their RDC products.”*

Jeff Windham; Vice President and CFO  
Columbus Community Bank

## *Unleash the Power of RDC™*

Thanks to our industry leading *RDC Select*™ platform, we have simplified the process for delivering, implementing and servicing RDC. We make it easy for you, so you can make it easy for your customers. We believe that a successful remote deposit program starts with a quality product and follows with education on the benefits of RDC. Cachet's executive account team is committed to this process and to helping you *Unleash the Power of RDC*™ through staff and sales training and a targeted marketing strategy. Through our unique solutions, we will help you strengthen existing customer relationships and improve your efficiency and bottom line.

## *Cachet is different because we:*

1. Deliver a premiere technology solution
2. Eliminate the need for significant capital and infrastructure investments
3. Work with you to ensure utilization through unique and strategic marketing support
4. Provide world-class customer service to you and your end users
