

select Mobile™

What if you could offer your customers a way to deposit checks without driving to a branch or ATM?

Cachet Financial Solutions' *Select Mobile*™ software, offers the advantages of remote deposit capture (RDC) to individual customers and business clients.

Through a custom-branded application on a smartphone or tablet*, customers snap pictures of their endorsed checks and submit them for processing. All transactions are transmitted with multiple layers of security and, if necessary, can be traced back to registered smartphones, marked with time and location, in order to combat fraud.
